PROFESSIONAL SUMMARY

Frontend Developer with **3.9 years** of experience building scalable, high-performance web applications using **React.js, Next.js, TypeScript, and Redux Toolkit**. Experienced in server-side rendering (SSR) and static site generation (SSG), real-time features with **WebSocket**, and UI performance optimization through code splitting and lazy loading. Additional experience with Chrome Extension development and cross-platform mobile apps using React Native. Proven ability to collaborate in Agile environments and deliver production-ready, accessible interfaces.

TECHNICAL SKILLS

Frontend Technologies: React.js, Next.js, JavaScript (ES6+), TypeScript, React Native, HTML5, CSS3, Sass, Tailwind CSS, Material UI

State Management: Redux Toolkit, Context API

Rendering & Architecture: Server-Side Rendering (SSR), Static Site Generation (SSG), Component-Based Architecture, Responsive Design

API & Realtime: REST APIs, Axios, WebSocket, JSON

Performance Optimization: Code Splitting, Lazy Loading, Rendering Optimization

Tools & Version Control: Git, GitHub, Bitbucket, Azure DevOps, Vercel, Chrome Extension APIs, Webpack

Testing & Debugging: Jest, Unit Testing, Postman, Swagger, Chrome DevTools & Debugging

CI/CD: GitHub Actions, Azure DevOps Pipeline (basic knowledge)

CMS: Adobe Experience Manager (AEM)

PROFESSIONAL EXPERIENCE

Agiliztech Software Services Private Limited

Software Engineer

Nov 2022 – Present

Bengaluru, India

AllMileOps.ai (Web) — Fleet & Logistics Management Platform | *Vite.js, React.js, Tailwind CSS, WebSocket*

- Built scalable, reusable React components for dispatch planning, fleet setup, CSV upload, and load management workflows.
- Integrated REST APIs and collaborated with backend teams to resolve UI issues and improve feature quality.

Showcasa-AI (Web) — AI Media Generation Platform | *React.js, Material UI, WebSocket, Framer Motion*

- Built a reusable React component architecture and implemented real-time AI generation updates via WebSocket.
- Developed Framer Motion animations and reduced initial load through lazy loading and code splitting.

Showcasa-AI — Chrome Extension (Try-On Studio) | *React.js, Material UI, WebSocket, Chrome Extension APIs*

- Built a Chrome extension injecting an AI Try-On panel on e-commerce sites, with real-time outfit preview via WebSocket.
- Managed Chrome local/session storage for persistent UI state and fixed an event listener duplication bug affecting notifications.

Showcasa-AI — Mobile Application | *React Native, GitHub Copilot*

- Developed cross-platform, performance-optimized UI screens for real-time AI output preview.
- Integrated APIs to deliver AI-generated media across mobile platforms.

SpendWorkz & Leap Reward | *React.js, Material UI, Tailwind CSS, Redux*

- Developed React-based UI components for supplier management and reward systems using Redux state management.
- Built responsive interfaces with Tailwind CSS and Material UI.

SaaS Migration — Adobe Experience Manager (AEM) | *AEM, HTML5, CSS3, JavaScript, Sass*

- Built reusable AEM components using HTML5, CSS3, JavaScript, and Sass for client website migrations.
- Assisted with CMS integration across multiple client migration projects.

PERSONAL PROJECTS

Personal Portfolio Website | *Next.js, TypeScript, Tailwind CSS, Python*

- Designed and built a personal portfolio using Next.js (SSR/SSG) and TypeScript for optimized performance and SEO.
- Implemented responsive, accessible UI with Tailwind CSS; deployed on Vercel with GitHub-based CI/CD.

PROFESSIONAL DEVELOPMENT

Generative AI Workshop — Amazon Q & Kiro (AWS, 2026)

- Explored Amazon Q and Kiro for AI-assisted development workflows at an AWS-hosted generative AI workshop.

CERTIFICATIONS

React JS Frontend Development Certification (2022)

Vasavi Creation CSC Center, Thuraiyur, Tamil Nadu

- 6-month intensive program covering React, JavaScript ES6+, and responsive UI development.
